

# Rodrigo Alfonso

FRONTEND ENGINEER

## ABOUT ME

+4 years of experience as a Frontend Engineer in **high performance** environments. I generate impact by **getting involved** in the design and development cycles, in the creation of efficient, accessible user interfaces and **reusable systems**. Proactive mindset and focused on the iteration and delivery of **quality** and high-impact products.

## MOST RECENT WORK EXPERIENCE

### Frontend Engineer at Applica

November, 2023 - Present

#### Responsibilities:

- Plan tasks, make a user story mapping, burn up and burn down chart to follow daily metrics to reach the committed deadline date.
- Organize and **lead** the team, making an important link between Backend, Frontend, Experience Design and Quality team roles.
- Write **scalable** and quality code

#### Key accomplishments:

- I managed to consolidate a client for the company due to the **success** of my project management skills.
- I increased the seniority of my colleagues by improving the **quality** of the product generated.
- I managed to increase the speed and **efficiency** of the team by 20% by establishing processes that improved the maturity of the team and **helped** to improve the technical skills of my teammates.

#### Technology stack:

- TypeScript | NextJS | TailwindCSS | NodeJS | React Native | Expo

### Frontend Engineer at Movistar

November, 2021 - 2023 - B2C

#### Responsibilities:

- Planning, development, and delivery of B2C functionalities in the "Mi Movistar" application on web and mobile platforms.
- Design, analysis and coding of **intuitive, scalable** and reusable frontend interfaces.
- Continuous **iteration** on functionalities with high user concurrences and **optimization** of experiences based on NPS metrics

#### Key accomplishments:

- Co-leadership, generation, design, and implementation to improve and **migrate** reusable UI components, within the framework of a **component library** and design system **migration**.
- Improve frontend **code standards**, impacting the different development teams. Through proposals, and proactive and generative participation in frontend communities.
- Improvements in application **code quality** due to knowledge sharing with my teammates.
- 25% **increase in sales** within the "Mi Movistar" app due to a streaming services sales feature that I implemented with my team.

#### Technology stack:

- TypeScript | NextJs | Enzyme/Jest | NodeJs | CSS Modules

### Frontend developer at Applica

August, 2021

#### Responsibilities:

- SEO friendly** and accessible frontend development. Using interfaces with "server side rendering" to optimize response waiting times along with the user experience in a reference application of social networks on a web platform.
- Building **responsive** and user-friendly features with modern CSS code standards.

#### Key accomplishments:

- Improving **web performance** through performance analytics and reporting

#### Technology stack:

- JavaScript | NextJs | React-testing-library | NodeJs | SASS

## HARD SKILLS

- SOLID/TDD/Clean architecture
- Coding using code readability over “elegant” code
- DOM manipulation
- SEO/WPO
- Modern layout practices
- BEM and modern styling conventions
- CI/CD
- UI - UX - UXW

## SOFT SKILLS

- Effective communication (SMART)
- Code reviewer
- Agile Enthusiast
- Emotional intelligence
- Resolution mechanisms
- Problem resolver
- Frustration handler
- Knowledge feeder

## TECHNOLOGIES

- JavaScript
- TypeScript
- React
- React Native
- GIT
- NodeJS
- WEB API
- NextJS
- Redux
- RTL (React testing library)
- Jest/Vitest/Enzyme
- HTML
- CSS
- SASS
- Styled-components
- PWA
- Github/Gitlab
- Figma

## LANGUAGES

- Spanish
- English
